PI Planner - the innovative and collaborative solution for the management of IP assets

PI Planner has been designed to help organizations integrate Intellectual Property management into their global strategy, whether they have an internalized department, or not.

From catching ideas to monitoring their protection, PI Planner helps you transform your innovation capacity into value creation and enables you to activate different levers such as licensing, direct valuation, assignment of rights or even management of collaboration contracts.

A user-oriented solution to allow you focus on the essential: your know-how

No need to juggle with different spreadsheets, databases or other sources, PI Planner provides one-click access to all PI data and indicators

A one-click overview of the IP asset portfolio:

- All IP data gathered in one place and accessible in one click
- Centralization of invention declarations, contracts, documents, budget, procedures, agenda and contacts
- Clear visualization of the geographical scope of each family and the status of the procedures

A collaborative approach for efficient management

- Real-time sharing of information with all the players in your innovation ecosystem
- A tool for the digitalization of your IP management processes

Continuous capture of R&D activity

- Recording of invention declarations and associated documentation
- Management of inventors' remuneration

A solution at the center of your innovation ecosystem

An IP budget under control

- Recording of expenses and revenues for each asset family
- Provisional budget
- One-click visualization of upcoming costs

A complete set of indicators to support strategic decisions

- Global indicators to manage the dynamic of your portfolio.
- Specific indicators to help you control your budget: overall cost per family or per technological group, segmentation by cost nature, etc.

A reporting tool for decision makers

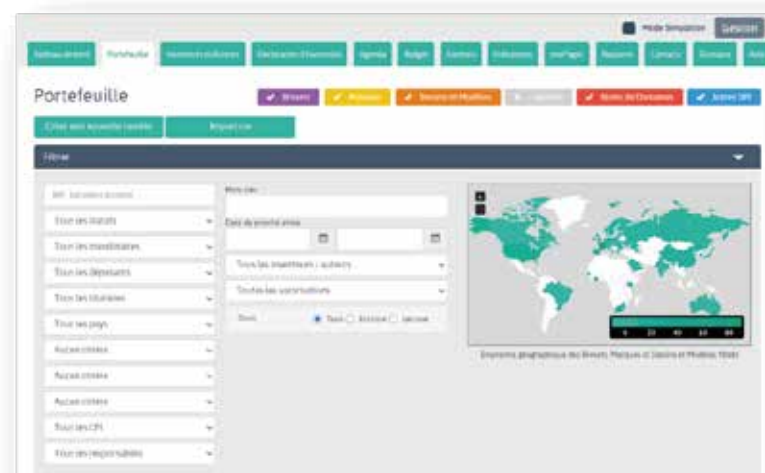

- View a dashboard of key activities, highlights, tasks and deadlines at the end of the month
- Create reports in one click
- Simulate portfolio hypotheses for arbitration by the IP committee

An offer designed according to your needs

Find quickly what you're looking for:

- Quickly find what you're looking for with a set of predefined filters and use search criteria by dates, keywords, owners, countries, technology groups, types of intellectual property rights...

Subscription

- Simple pricing independent of the number of users
- All PI Planner features
- Personal training
- A storage space for portfolio documents

Hosting according to your needs:

- In SaaS mode on servers hosted in France by a French company
- On Premise mode
- License mode

A dedicated team:

PI Motion supports you during the initial integration of your data into PI Planner and train you in the use of the software.

PI Motion also offers specific consulting and coaching services for IP portfolio management.

Rethink the management of your IP portfolio with PI Planner

- A business-oriented solution that meets users' needs.
- A set of essential functionalities for managing IP assets.
- A particularly attractive cost/feature ratio
- A clear and no-surprise pricing structure that only depends on the number of shares held by the companies and not on the number of users.
- A solution natively developed for SaaS mode, integrating the latest developments in this field, and offering flexible access and security for all portfolio data.
- A 100% French solution, developed and hosted in France.
